Hey guys,

I'm unable to connect to Westwood online today, for an unknown reason. After click "Advanced Game listings" it hangs at "Connecting..." and then errors out "Cannot connect to server. Cannot connect to Westwood online"

I've been playing all month, and played a game earlier today as well. I confirmed that the following ports are still forwarded to my PC

TCP Ports
3840, 4005, 4808, 4810, 4995, 7000-7002
UDP Ports
1234-1237

I've reboot the system, power cycled the cable modem and linksys router. I think this is kind of strange, considering I've been playing for years and never had a problem, and all of a sudden today things stop working. Anyone else having problems?

I don't have time to fully troubleshoot it tonight, but will tomorrow if no one else is having issues. Let me know.

Thanks,
Adam

XWIS Now host the Westwood servers, XWIS Most probably were restarting the servers, or updating the OS used, Or upgrading there Hardware.

It should be back online soon.
