WotS download/stream links.

Like War of the Worlds and Garry's Mod? This is a must watch movie then.

Even i haven't seen WotW but i could probably guess what it was about from the name. Wars between Worlds. Well, this is based around wars between casual players and the aptly named, 'Mingebags'. The Mingebags have created contraptions to 'remove' and crash players and servers. With the admins trying their best to stop them.

The film follows a builder and his admin friend across several servers to find and fight these Mingebags and their contraptions.

I give it a 5 star rating just for it's greatness. Any Gmod player will love this video and it will make you 'lol' alot.

Check it out.
