Long time to load? Maybe you should get a very powerfull computer... like mine.   But there isn't really anything you can do to make them load faster except get a better computer. Get the latest dell with 512 ram, hyper-thread proccesor, high-end graphics card, ect.

Have you installed Kazaa or Gator? These programs steal all free resources.

Well, you can't just have instant loading (unless you have like a Raid[like me]) but my raid still takes time...i don't get why loading is such a pain to you, but it could be a magical thing called "Patience"

        .pkg files take longer to load up. They tend to lag the MOTD when you log onto WOL, because the game has to open the package, and load up the map.It's not your computer.
