Hey guys, I was just trying to launch Renegade but it gave me this error.

I have the latest version of scripts, but this happened when I installed the scripts.

Did you update DirectX? Try that.

K, I reinstalled completely and still no luck. I did update my directx to 9.0c and still no hope. When I try to launch renegade, theres a black screen and after a few seconds it just... disappears. I would appreciate if you could help me solve this problem, thanks.

Go back to scripts 2.9.2.

What goztow said, or see if using this copy of the file helps.

THIS FILE IS NOT OFFICIALLY SUPPORTED BY BHS, ALTHOUGH IT IS AN UNMODIFIED COPY OF ONE RELEASED BY BHS.

He contacted me on MSN and I pointed him to the reinstall sticky. Haven't heard from him yet.

I fixed it now, it was the scripts 3.*.*

Thanks
