The topic sums it up. As you know the calico machine gun was seen in 2 tiberium dawn videos, Where a gdi light infantry shot a poorly armed noddy . But I thought that I'll show you my work and will ask for anyone to spot pyhical errors.

-- Yes, I know i streched it, it will be fixed

Pic I used to make this

Please note this is still a work in process.

Also included is a simple mesh with no bones in w3d format.

Right this second, im am uv mapping it.

Changes I made

1. added grooves to the barrel
2. better grips
3. redid the stock
4. resized it to renegades scale
5. added a bolt and other mechanims
