Meh, it's definitely not your scripts.dll or anything like that...did you try to hex-edit server.dat?

Let me guess, trying to start up a cheaters-only server? Nothnx, the idea has been discussed before, and expecially a cheating admin wouldn't help the situation

TroopRM02, Get the heck out of this topic, unless you have someway of helping with the problem at hand.

Try re-installing.

[View Forum Message](#) <> [Reply to Message](#)

I'd say server.dat needs to be replaced, just download the one from Black intel and see if the server loads, if not, check serial, hostname, and passwords.

Tunaman wrote on Fri, 13 July 2007 19:37Are you using SSGM? Are you using any plugins?
Yeah, using renegade reurrection ssgm, and that lua plugin for ssgm.

Edit: Ok, I found the problem. I installed ssgm wrong apparently. I put the ini file in the wrong folder.

Server nickname + password and Serial all good?

Yes. I used the serial in the sticky topic, and changed it to my game serial that I had to find through regedit. Plus I tried 3 different accounts + passwords with the server. Still won't start up.

I cant even get that far with my fds anymore, I miss my old server....

Your problem is a bad hostname or password/key

Make sure your hostname is ok and exist, make sure your password is 8 digits, and make sure your using your renegade serial without the - inbetween the numbers.....I WISH MY FDS WORKED AGAIN *cries*

Subject: Re: Server Won't Start

AoBfrost wrote on Fri, 13 July 2007 22:30

Your problem is a bad hostname or password/key

Ok, thanks. It works now. I used the serial generator at
<http://www.renegadeforums.com/index.php?t=msg&th=19368&start=0&rid=20681> .

Subject: Re: Server Won't Start
Posted by [AoBfrost](#) on Sat, 14 Jul 2007 03:42:00 GMT
[View Forum Message](#) <> [Reply to Message](#)

Thats not a generator...it's a serial changer.....although the serial it always presents me when loading the serial changer isnt my serial it's always random.....maybe it COULD be a serial generator...but i dunno if the serials it shows me (the ones that arent mine on startup) will work or not with a FDS.....blue then you gave me an idea...that might work and bring my server back

mine just says

```
"detecting bandwidth.....1mbps detected  
Failed to login  
retrying  
Failed to login  
retrying"
```

Maybe using that will work,...dunno

I've had weird times when hosting as a certain name wouldn't work so I added a 1 to it...then it worked.....hmmmm

...Install fds, install ssgm, install server.dat at blackintel.org, set everything to desired settings, use the "serial changer" at
<http://www.renegadeforums.com/index.php?t=msg&th=19368&start=0&rid=20681> and use the serial it gives you and put that in the serial place in the settings file, and tada.

Thats not it, I have tried many, but the problem is it wont even login.....if it would fail to create channel, then it would be hostname/passwrod/serial issue.....I've tried it many times.

Yeah, using renegade reassurrection ssgm, and that lua plugin for ssgm.

Edit: Ok, I found the problem. I installed ssgm wrong apparently. I put the ini file in the wrong folder.

Im glad to see you agree with my view point since you don't even comment

Its a pure shame to see people helping out the same type of person/player who FUCKS OVER server owners but now wants help to put his own up? Don't Think So.

Please read my first post in this topic, Then get the fuck outta' here, Please.

Thanks.

BlueThen wrote on Sat, 14 July 2007 21:31 use the "serial changer" at <http://www.renegadeforums.com/index.php?t=msg&th=19368&start=0&rid=20681> and use the serial it gives you and put that in the serial place in the settings file, and tada.

Again, that serial changer provides you with a serial HASH only, you need the ORIGINAL serial copied exactly (but without the -) from the back of your game manual. If you don't have your game manual anymore go and buy a new copy, it's easy to find in the bargain bin, usually on offers like 3 for £5.

Um, every single shot from your pistol was HS, you said a simple ":D" test and only tpyed ":d". You were extremely crappy with tanks and everything else, see here:

<http://img523.imageshack.us/img523/5574/screenshot153nf1.png>

Debate what you want here, Ill let you have that chance. Heres also a few things to consider. This

took place in demons marathon serv, no core patches, no renguard, no biatch. Ive played with frost before and his vech skills are as poor as always, but his pistol=MUCH better over night? He was pistoling me better than most cw.cc players and if I didn't wall hug he would have hs'd me 12 times and I would have died in 1 clip. I dont think so. Why would he argue to come test then only type ":d"?

Posted by [AoBfrost](#) on Sat, 21 Jul 2007 02:06:51 GMT
[View Forum Message](#) <> [Reply to Message](#)

I have a great excise for that ":d"

the truth is.....troop himself admits i dont cheat in his last post rofl

he claimed i typed ":d" which means to type it i did have one capital character the : meaning I DID HIT SHIFT!

Your tested proved nothing, I did type :D, then you told me to type it again, i hit caps by accident then hit shift at same time which is why the second D isnt capital, I have logs backing me up, all server mods have taken a look at them including AOB leaders and have seen I am innocent, try and get me banned 02, you will fail because 1 thing, i didnt hax, that pistol kill was lucky, the sniper shots were easy because you walked straight, all i had to do is hold fire down, those pistol shots werent all head shots, i used over 6 reloads, my vehicle skills cant suck that round if i never purchased a vehicle, teleporting isnt aimbot spectate, it's called server mod we made that teleports you to players for cheat test, and finally, your screenshot shows nothing, that was right when you joined and asked for test, i refused because

1. your not a aob mod
2. I didnt even do anything and you randomly come for hax test to test me
3. Your testing method is bad, biatch doesnt catch all cheats but will catch common ones, biatch doesnt stop some cheats, ours stops aimbot, dmg, bighead, and purchase because it logs directly from ssaow, which cant be wrong unless your saying renegade itself is wrong.
4. If i did use an aimbot, why didnt the poke message show? poke message shows when people are aiming invincible modeless bots around player heads, message shows "AoBChopper: OW your poking me!" in irc, none was shown in our saved logs, how did i gte all hs if i would have aimed chopper bots, you dont belive me because you cant code and rely on others anti cheat, there are such things as custom anti cheats which work like biatch....
5. if you can make a argument upon my responses, you must be retarded because all my arguments are based off server logs.

and a off topic

6. I cant take you seriously when you ask for hax test, i teleport to you, and you rape me with c4's when i told you to stop. Then I GET BLAMED for dying

btw you lied your last message saying i didnt type capital D, check j00r renlogs nubcake!

So you admit to using RH*H? Lol..

No, really, read the text on the Screenshot you posted, Most are all handled SERVER SIDE, or when you host the server.

Please note I used caps on SERVER SIDE so I can make a point.

"Spawning stuff in front of you is possible client side on someone else's server." Ya, I'm pretty sure that only works when you host a server, lol.

I think I'm correct to say "Ignorance is bliss" for you, Troop.

^^thank you for bringing that up, now can you please show me a SINGLE example of where I have been WRONG? Have fun trying.

Well, the people you accuse after they were proven cheaters don't count.

And yes, I have seen several times where you and your arrogance is wrong. Honestly, I'm not in the mood to dig through a bunch of crap... I don't stalk.

Leave me the fuck alone.

I'd rather kill the forums by interereng with cheaters, then they kill the game by cheat. Who ever started that thread about the IQ of cheaters was more right than I thought.

btw if you're too dumb to know, me saying that I'd rather be a cheater doesn't automatically makes me a cheater.

btw, my iq is around 130.
