Hey guys! I just launched my small radio station. It's not always online but I will try to have it online as much as possible. It's ad free and the only thing you need is Winamp or any other program that plays .pls files. You can connect via this link:
http://208.109.236.118:45620/listen.pls

To see the songs that have played already or that are currently playing:
http://208.109.236.118:45620/played.html

The station plays:
System Of A Down
Dimmu Borgir
Disturbed
In Flames
Linkin Park
And more.

I currently have 126 songs in the database.

You can also make your own archive existing of 20 - 25 songs and upload them via megaupload or any other filehost so I can add them to the database. Remember: ONLY METAL MUSIC! No hiphop or rap or whatever. Songs that aren't related to Hard-Rock/Metal will NOT be added.

As I said in the post:
Submit your own songs by sending me an achive with 20 - 25 songs so I can add them.

PS:
Filenames must be this way:
Artist - Songname

Sounds like a good way to build your music collection.
