So I installed this thing for TFD "XCC TFD Shortcut Installer" from here: http://xhp.xwis.net/ And now renguard doesn't work, game2(without renguard) loads fine though, is there any way to fix this here's the error:

Goztow wrote on Wed, 02 May 2007 13:391. delete woldata.key from your renegade directory
2. go in start menu to 'run'
3. type in the box that shows up 'regedit'
4. scroll in the registry to HKeyLocalMachine\Software\Westwood\Renegade\Serial
5. It will have an amount of '-', replace these with your renegade serial
Try that. You can also go to the strike-team forums and complain.

I would ask on other forums but I like to ask here and on that note now I get another error "Renegade not found".

:/

At that point, I would just reinstall. Follow the steps in this thread:
http://www.renegadeforums.com/index.php?t=msg&th=24533&start=0&rid=3 134

Only, this time, don't install that XWIS junk. Just go into Renegade's folder, right-click game.exe, click Create Shortcut, and drag and drop the shortcut onto the desktop. Do the same thing for game2.exe if you're going to install RenGuard in case you want to play without RenGuard.

As a side note, you might want to get the RenGuard installer from this thread I made since the new one doesn't create an uninstall entry:
http://www.renegadeforums.com/index.php?t=msg&th=25184&start=0&rid=3 134

I fixed the problem by moving woldata.key which was one directory short of the Renegade directory, into the Renegade directory, no doubt EA's stupid super-script (TM) things did it. (I made woldata.key with the CCR serial tool)
