Is renegade installed on the PC? LE will only work on machines with Renegade properly installed. Also if you use TFD I think theres some registry fix you need to do to make LE work properly, search the forum for TFD Registry Fix or similar.

Delete all, reinstall.

Sounds like you have a bad copy of renegade on the on computer is all.

EDIT: <http://www.renhelp.net/index.php?mod=Content&action=view&id=Getting+Star ted>

Do that and you should be all set.

Create shortcut on desktop to setup.exe and under properties compatibility set it to Windows 98, disable visual themes and advanced text services. Maybe that will work..
