Did you download the LVLS from ftp.westwood.com ? Just click on the level file and it should load, they wont load anything if u are using the terrain thats in level edit. You need the lvl file.

Download this.

<http://www.game-maps.net/index.php?action=file&id=522>

You can get other .lvl files too from the same website.

Yea, all you did was load the terrain, not the level's files.
