Copy the map via right click, Go to your C:\Westwood\Renegade\Data folder and paste your map there.

That's usually the default location. Sometimes there are other places if you installed it differently.

The above used to confuse me!! But its correct.

Find the above path in My Computer and then look in the drop down box (the one with +,-) for each of those individual folders, in the same order as above.

Finally you will find the data folder. Hover over the data folder with your mouse and click the folder to drop everything into it.

I used to enter that path into run, search and f**k knows where trying to do it until I too was shown in lay mans terms.
