What map had the double story GDI COM Center with computers and screens and red/blue lights in it again?

I'd be really grateful if someone could help me.

lots of maps do.... dm_center is one of them.

If your looking for a specific map you will have to be more specific.

DMCenter & DMCenterTS does NOT have a GDI Communications Center in it at all.

I'm looking for a GDI Communications Center WITH the blue/red lights on the sides of some rooms, the computers and screens in the top rooms, and second story to the MCT, etc.

If you know any maps with GDI Communication Centers in them please let me know ASAP please!

I've already checked C&C_Mars and C&C_Country_Meadow and they only use the basic GDI Communication Center, not with the red/blue lights and computers and such.

This is more of a Ren mod topic.

If you want the model of it then ask someone for the model, i'm sure renhelp.net will have it. If not then look around.

I dont think there ever was a two story GDI communications center, because it was never used in the single player campaign. Perhaps you can use the Nod one and change the red textures to gold ones?

EDIT: And I was going by the topic TITLE, which reads 'Renegade Com Center', not 'GDI Communications Center' or similar.

I need the textures listed, here is the GDI Com center I'm using. If anyone can supply those textures I'd be really really happy. It's extremely important to the community of World Wide Help.

Ok, so apparently there is a two story GDI communications center, I don't recall seeing that before.

Anyway, you can get the texture names by clicking on each of the parts, hitting M and reading the name of the texture from the Pass 1 -> Textures tab. I just tried it using that gmax file and it works fine.

C&C_Eglin_AFB.mix or C&C_Airbase.mix has a custom Communications center kinda.. well, more of an Air Tower building really, maybe he means that

Didn't C&C_Mars have a GDI one and a Nod one?

Ok guys, look at that COM center I uploaded. It's not custom, it's an old version I know. I've seen it only once before in a map (I don't remember what map). If the textures were in always.dat we wouldn't even be having this discussion now would we? Like I said before, I checked Mars and it was only the simpler version of this COM center >.<

C'mon someone, please help me out. :/

Patience is a virtue.

Can you describe more about the map, what else did it have, was there any water or roads or houses etc etc. This will help greatly.

If not search though all you maps in your data folder.

Have you tried the texture pack from the westwood ftp (ftp.westwood.com)? It has some textures that were not in the final always.dat in there.

I played the map a long time ago when I was using Uber Map Pack. The bad news is, I haven't run Uber Map Pack in well over a year now, I only run newer maps now sadly and it's in none of them. Since it's been so long all I remember is the cool GDI COM center and nothing more >.<

I'll try textures out today and hope for the best but if any are missing I don't know what I'll do. If you guys could list some maps that you know have GDI COM centers in them please do, it'd be very helpful in my search.

Some of the textures are in the building.zip that the gdi com centre is found in.
