I was working on the repair pad tut

<http://www.renhelp.net/index.php?mod=Tutorials&action=view&id=24>

i used my own repair pad that i had made in renx. But ingame the building is not working (damage bar) whats up?

did i have done something wrong with the names in renx? becoz thats not written in the tut.

help would be very appreciated

In a word, YES.

The meshes in RenX must have a specific prefix. Check it is the same as the mesh prefix specified on the Repair Bay controller.
