OK. SF (Superior Firepower) need's a hoster for a Renegade server this hoster will be very welcome too join the clan but and enjoy its activity's. We would like a hoster that host's from his/her own computer so that no donations are needed. Or if anyone is willing to host a server for us that doesn't cost more because they already have one up would be great also if you want to join the clan that's fine just nip over to our clan site: www.superior-clan.net or you can contact me directly by MSN or email: azer_hayden@hotmail.co.uk

Thanks SFAngmar

P.S LoC died and I really can't be asked to change my name so thats why its LoCAngmar.

Hello I am the owner of -SF- Clan name is -SF-mdluffy. We are a really nice and caring clan and have a excellent Community too. We do a lot with Renegade and also A Path Beyond one of the Mods. We are trying to have a server for both of these games. you can contact my clan member Angmar or myself. We are in the middle of Recruiting too for both divisions and also Reborn and C&C 3 also. here is are history of the clan.

How to join:

You can post an application here, then we look over it a bit, and you will more than likely be accepted. Also, the general clan rules are here.

We're not really a strict clan, we're mostly a group of gamers that like to hang out and work together when we are in battle together.

Clan history

This clan first started 4 years ago by a man formerly known as Psych0. It was called Total Domination (TDxClan). I was a part of the clan and felt very accepted. The clan was a fair size (roughly 13 members). But some personal and financial troubles caused the clan's decline. I thought that was the last I'd ever hear of them....

About 9 months later, I got a message from my old boss, Psych0 (who had changed his name to xadet). He asked me to join his new Renegade clan called Superior Firepower. I was glad to join and glad to see a couple of my old buddies again. During that period, the clan consisted mainly of 2 games: C&C Renegade and Counterstrike. Although they were two different sets of gamers, they got along very well. During this period, three new recruits (myself mdluffy, rCadre/IonicObi, and bahamut) joined the clan.

But, once again troubles encountered xadet and he gave ownership of the clan to mdluffy, who

offered to purchase the site domain in order to keep the clan alive. For the past 7 months or so, we have changed domains about 4 times, and had much trouble recruiting clan members. But this past month has been the most progress I have ever seen in the clan's history.

I would like to thank the other three 'senior members' of the clan. bahamut, for being such a nice guy, Wyzeguy for your determination in getting soldiers for the clan and sticking with me though it all.

The -SF- clan right still growing bigger and bigger. I am very happy and thank all my members for sticking with me and helping me make this clan what it is today. We have around 30 clan members and we are still looking for more. So check us out. Thanks for your time everyone.

Free as in "We would like a hoster that host's from his/her own computer so that no donations are needed."

Type of free.

How many slots will you need?

www.aohost.co.uk

EKT or even Renzor or what they are called. can host for a fee.

but all the test finding a free host lol

We're crazy and think we're all that? You got that from me pointing out a hosting service for Renegade that I administrate?

If you're not gonna say who the free companies are, then why mention it dumbass.

I will host you a 3 player sniper server with beacons enabled for free*

Restrictions apply, only 1 player may use this server at one time, but 3 players can play in the server as long as they leave before another one joins.

20 servers running of 1 box = bad.

Here's a list !

aohost/tsugaming.
Renz0r
EKT

If you'd like a laggy server, Google them!

If you want the best hosting ever, Go buy yourself a dedicated box and pay the £/\$80 a month,
Now that's a bang for your buck!

Way to bash Renz0r more without any proper knowledge about what's running on the box
genious. There's only 7 running on the Renz0r-Hosting box. 4 clanwar servers and the rest public
servers. Another box running Renz0r servers is not part of the hosting. Get your facts straight.

And when one server gets full, The other server will lag.

Okay, 1 or 2, Maybe 3 servers on 1 box, is okay, If your trying to pay bills, But 7 servers? oh boy.

It doesn't matter how many FDS's is running on a server unless the dedicated server can support that many.

My box can support around 10+ FDS's with like 10 people in them (around.)

Single Processor Quad Core Xeon 5345 - 2.33GHz (Clovertown) - 1 x 8MB cache
4 GB FB-DIMM Registered 533/667
SATA Raptor 10k
1000 Mbps Public & Private Networking
Windows Server 2003 Standard R2 SP2 (32 bit)

Well we are deciding to go not with Renegade but with A Path beyond now. Since it is more played than Renegade. But we are still looking. If anyone can host that. Then maybe we can talk.

LOL! Fine print ftw.

I guess you would be the only clan for APB, I don't know of any others... and, well, I think it'd be pretty difficult to create a clan for a modification of a game.

EDIT: More played than Renegade? LOL. Go take a peek in n00bstories sometime.
