I'm thinking of making a space station map. If I do, I'm going to make space out of making a 2 sided geosphere and put a space field texture on the inside so it looks like you're in space. What space field texture should I use? And the sun looks alot differen't from space. What texture should I use for the sun?

Just find a black texture with white/blue dots all over it... And in 1 or 2 places put a brown/dark red cloud...For the sun, just put a sun texture...Search google for sun photo's(or go to the NASA site...)
