Hey well idk if anyone already hosting this or know about it but heres a file u place in ur data folder and open it and edit it to make ingame text different colors like nod team chat and gdi team chat public chat and private messages

well here just open it and edit to what you want

if download not working

heres what u do

- 1)make a text file
- 2)name it hud.ini
- 3)place this inside of it

[General]

NodHouseRed=0

NodHouseGreen=0

NodHouseBlue=255

GDIHouseRed=0

GDIHouseGreen=255

GDIHouseBlue=0

PrivateMessageRed=0

PrivateMessageGreen=0

PrivateMessageBlue=255

PublicMessageRed=255

PublicMessageGreen=255

PublicMessageBlue=255

4)if ur dumb read step 5

5)if ur dumb read step 4

enjoy?

Umm.. I was just fooling around and tried to recreate Sir Kane's HUD. I saw you commented on one of my youtube videos.. Was that about the HUD? I didn't know what you were talking about.

I don't remember, but yeah, that radar seems very useful.

Well. More useful than Renegade's standard radar.

[View Forum Message](#) <> [Reply to Message](#)

I was joking.. the HUD in that SS needs a special hud.ini to work.

I have sk's hud (n00bparty '07 ftw). It has some cool stuff but the fact that it crashes your shit on alt+tab blows donkey balls. And yes you need special stuff for it to work completly.

It's different.

<http://www.n00bstories.com/image.fetch.php?id=1098186127>

You can tell by the time/credits, the bars under the health/armor, and the map in the HUD is one of jonwil's flat-top views instead of on a globe like SK's

Subject: Re: Text Colors

[View Forum Message](#) <> [Reply to Message](#)

Yeah.. the reason it looks so incredibly similar is because they both use the textures from the HUD in FEAR. I changed mine a little bit though.

But what do you mean, SK's is on a globe? That sounds pretty cool but I looked at the two ss's and it looks the same except it looks like he hardcoded how to draw the radar blips.

And yeah, before anyone flames me on it, mine is just a cheap copy of his idea. :) I just want to be able to get all the functionality done I want for custom HUDs before I make new ones.. I want to make one BF2-style but I can't move the playerlist with the functionality built into jonwil's custom hud code. ;\

Honestly this is the first time I've done anything involving editing the scripts so don't hate.

orthographic viewpoint

every part of the map is visible from above under a 90 degree angle

Unlike that picture, no feelings of extreme ROFL crossed my mind though, I must have done something wrong.

Like this <http://www.n00bstories.com/image.fetch.php?id=1180464568>

...? That's exactly what the image for my islands looks like as well.. I still don't know what you mean by "globe"

Subject: Re: Text Colors

[View Forum Message](#) <> [Reply to Message](#)

Globe2. a planet or other celestial body.

3. a sphere on which is depicted a map of the earth(or Renegade map in this case)

4. a spherical body; sphere.

<http://img411.imageshack.us/img411/7129/w3dview2007081508150882es7.png>

It's not actually on a globe.. There is an extra water around the map that makes the optical illusion that it is.

[View Forum Message](#) <> [Reply to Message](#)

The difference is in one the view is just from a single point in the sky, where as in the other no matter where you look on the map it always appears as if the view is directly from above.
