Ok. Its m first topic. Im NOT English or American and i cant speak english good. It's my prolem.

I downloaded:

RenegadeFDS(i registered this)

SSAOW(I copyied files to renegadeFDS Folder)

Night Regulator (i Installed this)

And....There's many errors.

I starting my server from renegdeFDS folder.... When this creasting channel...There is an error-Failed to create channel...Creatind channel....Failed to create channel....ETC...

When i configure server from regulator and i want start server....night regulator is updating...in few minutes there is error „Runtime Error" ...And program shut down.

My questions:

What i must write in server port?

What i must write in remote admin port?

Can u upload for me yours RenegadeFDS folder and correct Regulator? PLEASE! I can do you moderator on server for this (new maps,normal server) HELP ME!

First of all, I'd like to thank you for trying hard to post with good english, I understood all of what you said.

As for the "failed to create channel" problem, make sure that the serial number in your server.ini is a serial of a copy of renegade that you have.
