Hello,

I can't get renegade to start on windows vista

My question is, is there a patch or something that will make renegade work on my pc.

look at this

it worked but now i got a new problem.

of course i dont have core patch 2, so i need to download always and scripts.

when i click on always or scripts the site that is loading can't be found. So now i can't download always or scripts.

how do i get those files

and ye the live_register site to make an account has been down for a long time 2. Luckily i already have an account
