lol... i hate to sound like a troll but that LCD is pointless. when you're playing a game you shouldn't be looking at your keyboard instead of your monitor. The G11 would have been a much better (and cheaper) choice.

It was on sale for $37 after rebate so I could not resist.

MAIL IN REBATES!!!   *shakes fist*

Yeah I told him on AIM about how pointless that LCD is but he wants to be "l33t" and show it off to his friends.

He has shitty hardware but LED's all over the case...you know the type I talk about.

Ok, look

G11 53.99 then you pay $5-7 shipping.
http://www.newegg.com/Product/Product.aspx?Item=N82E16823126009&Tpk=g11

G15 I got 50.49 and free shipping+ a mail in rebate that makes it 37.49! What would you have bought???
http://www.buy.com/prod/logitech-g15-gaming-keyboard/q/loc/101/201935140.html

PS:I used google checkout for $10 off.

LOL yeah a 8800 is such crap...
A 2.6GHz dual core, even more crap!
Oh and my awesome case, the crappiest!
1GB of DDR2 ram, cant get much more crap then that!

I cant beleave I have such crap like WTF that hax!

Wow lets stick to fact for awhile:
(taken from weeks of AIM convo)

idjit626 (1:57:50 PM): and my CD burner dose it at 52X so its l33t!

idjit626 (4:27:28 PM): lolz
idjit626 (4:27:33 PM): u got any spare ram?
idjit626 (4:27:43 PM): i only got a gig of "value" ram
1 gig is hardly up to date.

idjit626 (5:24:12 PM): nvidia 6200LE
idjit626 (5:24:19 PM): video card
idjit626 (5:24:30 PM): it ran HL2 real good on lowish settings

Cant find the model of motherboard you said you had but:

idjit626 (10:19:53 PM): u can have my motherboard for $75!
Oblivion165 (10:21:19 PM): i want a good one though
idjit626 (10:20:08 PM): awww
Oblivion165 (10:21:26 PM): lol
idjit626 (10:20:12 PM): dont buy A-BIT
idjit626 (10:20:15 PM): they SUCK ASS

This is the only thing I could find on your processor because you spell like a jack ass:

Oblivion165 (5:18:03 PM): not sure, its been a long time since i used that one
idjit626 (5:16:56 PM): o
idjit626 (5:17:06 PM): well can u tell me socket?
Oblivion165 (5:18:28 PM): my dv9000t is core duo 478
idjit626 (5:17:16 PM): neat
idjit626 (5:17:21 PM): i got socket AM2 tho

EDIT: I will be gone for two hours while I drive to my parents house to visit, we will resume then.

So I said my motherboard sucks, it is no secret.

Also you have no life id you save all your conversations, especially the ones with me!

Cant we just do what this topic was meant for and help me find some cool things?

I'd just use a ten pound USB keyboard. It works.

Actually to burst your bubble the 8800 series cards do suck because they have errors in them that make games unplayable by stuttering. Your card may out perform my 79GS but i'd rather have a card thats a lower rating than to have one that doesn't work on newer games properly. This is from a Nvidia fan. So its not a bias thing.

1GB ram really isn't that much to brag about tbh.

Since when did I brag about the 1Gb of ram all I sad was that I had it, and I never had a single problem with my 8800. Can this be moved to dramallamaland or something?

Also you have no life id you save all your conversations, especially the ones with me!

Are you fucking retarded? Do you think he archives them manually or what?

Any decent messenger asks you whether you want to save your conversations or not.

Well it is AIM he is using... So descent dose not apply.

Is it just me or do 75% of the topics here turn into "why I think OP'er is stupid"

Apparently, but only when you're the OP.

I'm using AIM Ad-Hack and yes it has the option to auto save all convo's. I always turn of
archiving on any messenger.

Viking wrote on Thu, 23 August 2007 00:03No cus I sent him pictures over AIM before, cant do
that with trillan.

Funny, because I can.

With MSN, too.

As long as there's no firewall cockblocking the transfer, that is.

http://www.artlebedev.com/everything/optimus/ = win, full stop.

Want a little fun? (PS, Allow Java scripting)

Subject: Re: So I got my G15.
Posted by CarrierII on Thu, 23 Aug 2007 16:56:56 GMT

Nah, I use USB cos it's plug'n'play and I can then use it on any of the other PCs should a random keyboard fault develop.
