I'm sure this error has come up before, i don't want to reinstall Renegade because of disk space, and whenever i reinstall the game it gets messed up somehow with the config., i just wanna know if there is someplace where i can just download this w/o downloading any other junk, i tried downloading the FDS internet and extracting the internet file into the regular internet file for Renegade, but that didn't work for me, and uh i prob sound like a retard saying that stuff, but that's just cause i suck with computer stuff sides games XD.

Delete everything in c:\westwood\ and re-install renegade, when it asks to have WOL installed, click yes.

If you uninstall first, then it'll free up space. Then reinstall = as many space used as before.

Put your disk in. Goto reinstall when you're at the install screen, untick Install Ren and choose WOL components only

He has TFD, I don't think TFD allows this.

Start TFD.

There's an "Add/Remove" thing in the bottom right corner - click it.

Remove Renegade.

Get back to the TFD main screen, click Add/Remove again, and then replace Renegade.
