You can make a gdi turret. But you have to have a script for it that tells it to fire at nod forces instead of gdi. The equevilent to the turret is the guard tower. And gun emplacements are very stupid.P.S. I am the only one that has responded to your topics. Rate me five. [February 16, 2003, 10:53: Message edited by: dead4ayear2]

can i also just change the player type to GDI for the nod turret?Then i'd have to make another preset...how do i copy a preset to make the gdi setting on the other?

I've never thought of that but it's worth a try. And slow down on the posts. Or else westwood will ban you for spamming.

Objects->Vehicles->Mounted->you will find all of the gun enplacements used in MP and SP there.there are also "neutral" gun enplacements you could use for your base defenses, or first come first serve battle field enplacements.
