I thought 3ds max already could export w3d, mine does without any modification.

3dsmax can't export to ww3d. It exports to shockwave 3d, not westwood 3d

You need 3dsmax7/8, 9 wont work right.

If it doesnt exist, we cant just make one, this is renegade modding forums, not 3dsmax plugin forums, just download the demo for 3dsmax 7, I have the program and I can export working w3d files without any plugins.

You do realize he's done that multiple times, and has been pointed to the rule book everytime.

EDIT: Looked for one of his old posts, it must have been on a different forum... And yes, I did jump on him too hard.

Double post.

And, yes there is. But I'm not entirely inclined to give you a key.

I'll think.

There might be or might not be one in the zip, if there is someone remove it as I don't want to download it to see if it does.
