I use Renegade Public Tools /

i have made a mod package . saved it to renegade/data as a PKG.file . run renegade it can find the mod package but not the map.

can anyone help me plz ?

Nice useless post, why not stop being immature and help the guy out.

Anyway, make sure the map is in your Renegade\Data directory.

It's a PKG, so it should be inside it. If it's not showing up, make sure all your settings are sorted out.

That was uncalled for. You're trying to brag to everybody about the skills you think you have in level edit.

Use Johnwil's Level edit, Then go to File > Save > As .Mix, And it should work!

http://renhelp.net/downloads/LevelEdit_Jonwil.zip

If you need further help, I'll be happy to help. :

I've had this same problem... and, when I followed your advice and exported it as a .mix, it destroyed the preset terrain for my leveledit. Now, i can't get it to become normal again. I've reinstalled, gotten the objects from my friend, and tried many other things... So... two questions.

1) What do you do if the exportation of the .mix fails?

and

2) How can you fix a terrain that's been destroyed due to the exportation failing?
