Gah, i have to agree with carrierll, you guys are bitching tbh. and if you tested the files, as i did, they are no advantage stuff, they reduce smoke from lava and power plant, so therefor slightly increasing your fps at those locations... so cmon. But i think you need to post it at renguard section, they might add it, but lots of ppl did requests.

You guys are retarded. This is not a cheat at all.. All it does is remove the smoke from the power planets and the volcano tunnel in order to increase fps for people with poor computers. I sure know I wish they worked RenGuard because my computer has trouble with the smoke.. whenever I go to the power tunnel in volcano my fps drops to 15-20 while I normally get over 120

fps. :\

I use that skin. I get 10 FPS average as it is even with all the detail set to low on my mother's garbage PC. TuNa would know, he's seen my screenshots LOL. Before I got that file, I use to run into tiberium side tunnel of Volcano and dropped down to 4 FPS in the middle of a pistol fight. Now I don't anymore. I say RenGuard should legalize it. It helps for me not in an advantage way, but FPS way.

Also, if ReaL got it from the same site I found it on, I also downloaded something that doesn't reduce FPS when using Chem Sprayer, Flame Thrower and Flame Tank.

The smoke in the power tunnel on volcano does nothing except to add to the visual effects of the game. It doesn't actually make it harder to see people. :\ If you have trouble seeing through the smoke in that tunnel then you must have problems and should consult a doctor.

This coming from a guy who spent time delving into a computer game, and did coding to modify it.

Real doesn't even know anything about coding. The "tweak" isn't even his and has nothing to do with coding. Nice try flaming him though.

I'm guessing that if you ask for something to be allowed by RenGuard, then you obviously have enough spare money to go and buy a new computer! I mean, c'mon, who doesn't buy a new

computer just so they can play Renegade with less fps drops?

Like I said before, I have no opinion of this mod of his. If he wants to increase his FPS, and not gain any advantage, then it's all fine and dandy with me.

But I just find it funny when people go about saying they have better things to spend money on than a computer. So do I, but it's not as if everyone has to hear about that. I'm assuming most people don't spend all their cash on computers.

Dont use rengaurd if your gonna hate on the creators and call them nerds, they wont take anything and make it compatible, and we cant help if you cant buy a new computer, that just means your a kid, thus, play renegade without rengaurd, and use this mod then, I use tons of mods rengaurd wouldnt let me play renegade with, but their just beta models such as the backpack mod, cigar mod, beta pistol mod, bandana mod, weapon factory shunt mod, and beta under mod, and because of all these w3d files I have, I cant use rengaurd, So i decided not to use it, if you want to use something that isnt compatible with rengaurd, then just dont use rengaurd.

Oh and by the way, rengaurd does make renegade more fun, it stops n00b haxz0rs so we dont have to worry about testing everyone.

Oh and if you are old enough to get a job, please do so, if your 16+ and dont have a job, that means your lazy, I walk home and to work everyday after my feet hurt, and I enjoy doing so even with soar feet, so please dont be lazy and

Way to go off topic.

I can't speak for SoQReaL but I can't be arsed to buy a new computer just so I can enjoy a dead game that I only use for clanwars.

I been playing Renegade without RenGuard anyways since August till I get back home so the skin issue with the smoke doesn't concern me. I'm a pure Ren person, don't have a single skin on my GOOD PC in New York. Only reason I downloaded this is to maintain my FPS since my average is 10-12 where I am currently. So I won't be removing it unless Spooky has a problem with it on CW.CC.
