i cannot login
i put my screen name
password and the button login is inactive

8 character password, use a 8 character password, remember the 8 character password, I asked
the same thing when I first started with the new XWIS.

Does it still say it if you uninstall rengaurd, if it works then rengaurd may be the problem, me
myself have never had problems when I did use rengaurd, but who knows, check your internet
connection too lol.

Are you forwarded to XWIS? This could also be that renegade is looking for the old west wood
online server listing, although i was told it is forwarded to connect you to xwis, i'm not sure, oh
well.

I FOUND PROBLEM FOR YOU

http://xwis.net/downloads/XWISC.exe

Download

Run it, hit "set to XWIS" maybe it says "forward to xwis" i cant remember, DONT CHANGE ANYTHING, keep it the way it is and just click it, I have a PC which has an old ren installation on it that wont connect to XWIS, after using this tool, it worked right away, so this may be the case, try the tool.

Try the link I posted....

here it is again

http://xwis.net/downloads/XWISC.exe

click "set to XWIS" DONT CHANGE ANY NUMBERS, once clicked, exit, start ren, play.

tell me this

Could you have logged in before installing rengaurd?

if so, then try uninstalling it, it is in the renegade directory which is C:/westwood/renegade

look for a trash bik icon that says uninstall and click it, it will ask if you want to remove rengaurd, I doubt rg is the problem, but it's best to try anything.

yes i could login it before installing it.
and now that i uninstalled it i can log in again.
but i wanted renguard

This is very odd.

I'd pm someone like crimson or someone else in black hand studios, they are rengaurd experts,
are you also using any type of mods or w3d files or skins? that may also be the problem.

i got it...........YOUR NOT USING 1.037!!!!!!!!

Did you install the 1.037 patch? if not please go to ftp.westwood.com and go to the renegade
folder and download the patch, otherwise, get it on commandandconquer.filefront.com

you may need to reinstall if you didnt install this patch

1. install renegade
2. install 1.037
3. install rengaurd
4. tell rengaurd to update so it installs cp1 and cp2
5. play

found my solutions
the problem was that my firewall
wasnt allowing game2.exe
 http://www.renegadeforums.com/index.php?t=msg&goto=284210&rid=23164#msg_ 284210

thanks for helping anyway
i appreciate the help

by the way now that renguard is install i do
not see the lil logos that comeout on top of
the head like when you say a command..
like "i need repairs" shows a lil redcross
and i do not hear the count down of the ion or nuclear
i dont get all those new features why??

You need to install the core patches to get these. Check the sticky in the "core patch" subforum
for info on how to install them.

Also do NOT use that xwisc tool frost posted, XWIS changed their server addresses a while back
and anyone using that tool will be unable to connect. If you already used it, load it again and hit
reset to restore the original settings, or you will not be able to connect to the new server address.

Frost, please do not post that tool in future, as it no longer works
