Wait till the FSSBeta is released.

I thought Oxi released the server files...He made a news post about it on APB's forums...

HOW?

If the APB dev team had wanted everyone to be running servers for the beta release then they would of released one.
They will release a FDS installer when they are ready and have received and fixed all the issues/bugs.

It is possible to run your own server if you have an ounce of intelligence, based on your client files and a renegadeFDS. However it won't be as good or as bug free as the official MP server.
