You'll need to run Renegade (game2.exe and game.exe) in Windows XP SP2 compatibility mode and admin.

You need to install patch 1.037 before installing renguard, though. I recommend you to uninstall everything and reinstall using this guide.

Oooh, I can fix this one!

Some nice person put all the original Renguard-Friendly files Here (OMG out of bandwidth!)

Try to get at it later, there are also some files available Here

That post doesn't help. Not everyone knows what they're doing on a PC.
