Problem.

As any player connects to server, during 5 seconds all is ok, then player sees "Connection to server interrupted - Gameplay pending", and then server restarts.

I dont know - what happens thirst - server restarts or connection interrupts and server restarts.

All files without any mods ( excepting one patch - cd auth failed fix ).

Maybe somebody can upload correctly installed working server?

Thanks.

I've fixed the problem.

Full stable FDS v1037 with Night Regulator v0.3.5BETA8h can be downloaded from here:

I wouldn't download any version that's not hosted on the official ftp / webspace.

this hosting server is quite good  
i dont get any cash from this adds.

reuploaded file to rapidshare  
<http://rapidshare.com/files/60705041/FDS-Incl.NR.zip>

to download or not - your decision  
i guess we dont need any disclaimers lol
