You can, I have done it before. Have you changed the weapon preset in the Weapon preset box? I have given the turret a cool weapon before, repair beam So it fires the turret shell, but you suffer damage for the obelisk, interesting.

I gotta go ask my magical computer what it thinks.

Well you have to change the weapon preset to the weapon preset you want, I am still checking to see how to do it and BTW you should take a look at www.renhelp.net if you haven't already.

(This is a very hard and difficult question/problem)

NOT!!!!!!!!!!!!

Do note that this is not 100% server sided. The only thing that is, is the resulting damage. On the client it will always look like the turret fired its default shell.

Hey officer, stop being an ass. If you think you're funny, think again.
