I just installed renegade on my new computer and downloaded renguard and i keep getting disconnected from the scanning for the core patch 2 with this error message:

RenGuard has detected corrupt files. In order to install Core patch 2, you need to download fixed copies and extract them to your renegade directory. Mix files (maps) belong to the data directory.

it gives me 2 links to download stuff but neither of the links exist anymore i guess....  
what should i do?
