ok, I got a virus and had to reinstall windowsXP, nothing else in my machine changed.
specs:
AMDathlon3000
512 ddr
10g HD, 60 g HD, 100g HD
GeForce FX5700

When I go to install ren, I get to 2% of always.dat, then it just disappears, no error msg, no screen of death, no reboot. just goes back to desktop. I've tried updateing aspi drivers, but they were up to date. I've installe dren on this machine a few time before with no problem.

has this happened to any1 else before?
any idea's what to try?
help me out plz people, I needs my reny!

Does any1 have a cd image i can DL, maybe my cd is donefor?

PM Oblivion165 for an ISO, I remember he had uploaded one (without serial so you need your own!).

Sounds like the cd died to me .
