I installed Renegade, but when I try to play it keeps saying to eject and reinsert disk and try again. When I try to launch through Renguard it says cannot find wol server will fail. I have tried to trouble shoot this but cannot. I have searched the web and cannot find any answers. Can anyone help?

Did you try clicking 'cancel' when it asks for the cd? If that doesn't work, you'll need to install core patch 2 (see the core patch subforum stickies on how to manually install it) as it includes a no cd - crack.

The RG-thing is normal: it sayst hat because u never logged into renegade yet, so it doesn't know your WOL nick yet.
