We didn't put out Renegade. The now-defunct Westwood did.

But, yes.

RG actually works very similar to PB, except that PB is coded into the games it comes with (the way RG should be, and would be if we had the source code).

Thanks for the props, and good to see longtime players still playing...this is why BHS makes RG and other fixes, so that we can keep playing the game we all love.

People usually complain about Renguard., when a product is good you will hardly hear anyone say: "Hey its a good product.", because its easier to say it's a bad product and blame then admit that its a good product. So yeah it's awesome that you just shared this.

Meh if you try to cheat on a game, especially this old then that's really pathetic. Nevertheless Renegade is a good game. I hope to see a Renegade 2 in the future which hopefully can be said about it's at least in the shadow of the Renegade that we all love.
