Over the years I have collected many files for Renegade. Maps/tools/etc. So i'm just going to provide a link if anyone is interested. If people are interested, i can give you all public FTP access to download files if you are looking to download everything in bulk. Feel free to link to these files if you would like.

Currently I'm hiding mine on FilePlanet. My website is getting too large and we had to cut back on space.

I still got my iso if anyone needs it.

If anyone has any files they would like to throw in there. Just let me know. Andrew is going to upload me a huge db of maps to make sure all the maps are there.

BTW, that ISO is just the cd, there is absolutely no keys or cracks in it.

If anyone wants FTP access here ya go.

Host: ftp.dmehosting.com
User: renfiles_10
Pass: public

If anyone is interested in having a public folder to upload renegade files let me know. I wouldn't mind turning this into a Renegade database of files for everyone to store their mods/maps/files for others to download.
