In our modded server few commands are broken such as "kick". When i try kick xx it gives me "id xx not found". Any clue as to what is going on inside bhs.dll ? and if there is something that can be done to fix it. The server runs in lan mode and is using latest bhs.dll. we need kick for afk kick functionality.

Thanks in advance.

Why do you figure it's bhs.dll breaking this functionnality?

because its a console command so cannot be bot or custom scripts. Could only be bhs.dll or the game engine itself.
