Subject: Major FPS Lag
Posted by TSS888 on Sat, 17 Nov 2007 09:04:56 GMT

I don't know what to say.
A few weeks ago, i was able to run rene at 90++ fps. However, now, for some reason, the fps dropped to like 15-20? Please help?

Before:(fps is 94)

After:(fps is 17! omg!)

Check your settings (WWconfig.exe)

Make sure nothing's eating up your CPU time (Processes tab in task manager)

Pfft, I play games at 30-40 FPS and your complaining?

Check to see if any programs are taking up a lot of resources in task manager, WWConfig.exe, If nothing.. your graphics card might be failing..

It would help if you gave us your PC's configuration.

Did you change your scripts.dll to an older version, or a different version?
I once experianced a really low FPS with one release (it was patched and a new one was shipped in a day or two). But I know there are some releases that screw your FPS.

Hm... He reinstalled Renegade and I told him to to upgrade to 3.4.4 (he was using 3.4.4 during this lag thing, at least I have told him to upgrade before).

If I'm not wrong he has a 7600GS and a 2.4ghz Intel Processor.

The comp is quite new as he bought it around the time I did (End of May this year).

I asked him to check everything and he said he was able to run A Path Beyond at normal frame rates.

Computer Specs:
Intel Core 2 Duo 2.4Ghz
2GB ram
Nvidia Geforce 7600GS (512MB)

And yes, I can run APB with everything turned to the max with around 50-60 fps.

Try typing "client" after pressing F8, what it does is it tells your client to NOT process people's data that are off screen. So you get less FPS lag.

EDIT: Typo

I tried that, makes no difference, whether that was on or not.

Run in windowed mode with task manager opened and sorted on cpu usage. Check what is taking your cpu cycles.

Also, did u try running game.exe (or game2.exe if u have RG) on higher priority?

Ok, nvm all that. I finally found the working renegade disc and reinstalled it properly this time (the last time, i just copied everything from another computer). And it worked!   The fps lag was gone. Thanks for all the help here anyway.
