Hi, when i loaded up RG today i got the auto update, but now when i join a game it constantly says Gameplay interupted
gameplay restored

and so on and so on until i get d/c from game. can any1 plz help me here, is there prob wit new update???

---

tried game2.exe This just loads up renegade but renguard didnt start first. i thought maybe the RG server was down, because it finds it hard to connect to server1 and i also get the message connection to main server failed.

game2.exe loads ren without RG. The idea is to check if it's RG causing this problem or renegade .

So do you also havet he problem when loading through game2.exe? The update you're talking about: is that core patch 2 or a RG update?

no i already have core patch 2 it was a renguard update with new commands available etc, ill try loading from game2.exe see if it makes a difference, has no 1 else had problems or have they even received this update??

It depends which installer you use. If you use an old installer, it'll update itself, if not it'll not update . Maybe try redownloading the installer, I thought the newest one is on renguard.com.
