You are far from right.

Edit: I also agree with roshambo

What the official RenHelp.net server isn't popular? It uses every single custom map in our database!

Oh thats right people only care about server side mods and could care less about user created maps so the RenHelp server doesn't exist.

jelly servs have always been popular just cause ppl are lazy and dont want to scroll down

and user created maps suck balls cause they dont put the effort into testing them
