Game-Maps.NET has just moved to a new host and such has allowed us to expand into new games, so before we do, I would like to see what people would like to see hosted on the site and what games they play.

For the start, we are gonna move onto Call of Duty 4 as this seems to be a good new game to host files for and also MP now has a server for it.

Expanding into new games might result in us hiring new staff members to help with these games.

Any new staff being hired would have to be well known and trusted among the Renegade community and aswell by me.

Last thing, if you got any ideas on how we can make the site better or anything bad about it, then please say.

As always, the site files are being slowly updated with new versions and new files are being added, but it's a slow process.

Thank you.

Sounds like a good idea, even though I don't plan on getting UT3 anytime soon I think that would be a good game to expand to.(when it comes out of course)
