I believe he cant find the location of the file to patch it. God forbid someone just uses common sense or the search feature built in to windows.

Hmm its a patch for the server....wonder where the file would be? C:\Westwood\RenegadeFDS\Server

1) Run the exe

2) Where it says "File Name:" type in "C:\Westwood\RenegadeFDS\Server\server.dat"

3) Press open

A monkey could do that :/

Please do not repeatedly ask for replies. Your question has already been answered. If it did not work, elaborate on what the problem was instead of simply "it did not work."

Commando Burton wrote on Wed, 05 December 2007 17:59Hey I need to know where sever.dat is for no game play pending patcher or mabey im doing something wrong? You must be hosting a dedicated server, a normal server running from your game wont work wit hthis, also it should be in

Renegadefds/server

if not, maybe it's in the data folder, I dont remember.

THis offically marks the person we will now all ignore.
