[View Forum Message](#) <> [Reply to Message](#)

What do you think is better? Is it worth it to buy one of these when the game first starts, or wait for an APC? The speed of the buggy is great and the armour on the hummer is so-so.

What do you guys think?

A friend and I have kept the field under control from stinks and artys with just 2 hummers. Hummers are great if you know how to use them properly, as gozy pointed out camping at the strip at the start of the game is a real good strat.

it also depends on the map if it is a map without base defenses, it is a very good tactic for killing infantry and scanning for stinks (this is also for buggy)

But if it has base defenses it does not do much.

Depends on map... City flying and mesa allow buggies to be pretty deadly .

Don't like either, killed too easily, and i play in servers that have shells so they could be captured. Mainly only use if you need quick transport and even then :/

camping airstrip really only works for a game with 15 or less, otherwise 10 soldiers will overpower one or two hummers on the airstrip

The only real threat for them are noobjets and maybe PIC/Railgun. Can contantly rush otherwise, at least on defenseless maps. It's even possible to reach the GDI powerplant on City (both versions) with close to no damage.

Aren't they just kind of.....The same thing.....? I mean, sure they look slightly different, but they have the same stats and stuff.....

By the way, just my 2 cents: Another thing deadly to the buggy/humvee? Pretty much any automatic weapon. I can EASILY take down a buggy with a solder. Easily. If they have very good aim, its slightly harder, since they can headshot me, but usually if I dump 2 clips into them, maybe less, that buggy is gone, and whoever's inside is going to get ripped apart shortly after.

no they do not.

Hummer has 50 more armor and 50 more health and costs \$50 more.
Buggy is faster

Both do same amount of damage as a APC does

Basic GDI Rifle infantry can take down a buggy really easily. Due to the fact the buggy is weaker, and the GDI Rifle does 7 damage per hit.

Takes a bit more work from NOD rifle infantry to take down a hummer. since the hummer is stronger and their rifle only does 5 damage per hit.

The people that !forcerg the hell out of everyone are just random players, we can't do anything about that. St0rm is loaded with assholes, along with Wil0storm himself, and the players at Jelly are garbage (Not including RA, there are some pretty bad ass players in there).

That's like saying condoms don't block STDs and babies, so bother using it? It's not 100%, fine. What is 100% effective? Furthermore, it's better than nothing, and since there is currently no alternative, RG all the way.

If RG is making you load Renegade THAT much slower, you might want to invest in upgrading your system to something better than a Pentium II.

1. I got a DualCore and 2 Gigabyte of RAM. It obviously takes me longer to load because first Renguard has to start-up.
2. *cheat name removed*is getting updated about 1 Day after a new Version of Renguard as far as I remember, and most cheaters have *cheat name removed*. So whats the point in using Renguard?

1. If you have a Dual;Core and 2 gigs of Ram, the difference in loading time should be minimal at best. I have a non-DualCore and 1 gig of Ram, and the difference in loading times is marginal at best. Well within my patience and attention span.
 2. See condom analogy.

It has been known rg has been bypassed for a while. Still no updates since then.
If you suspect someone to be cheating in your server, and they are running RG. Do you trust it?
Do you continue to let them play?

I don't trust RenGuard 100%. I don't trust anything 100%, really. That would be silly.

However, if I have two equally suspicious players, and one is running RG and the other is not, I'm apt to believe that there is a higher likelyhood that the one not running RG is cheating compared to the one that is.

I'll try you. Tell me exactly the name of the server.

Subject: Re: Hummer vs Buggy

Posted by [JoeBro](#) on Tue, 15 Jul 2008 17:26:25 GMT

That's hard to say. An APC can hold more people and has more armor, but then, it costs more money and moves slower. If there were enemy defenses, I'd wait for an APC. But if there isn't any defenses, I'd choose the cheaper and faster Humm-Vee or Buggy. As for which one is better of the 2 (Humm-Vee & Buggy), I'd say it depends on the situation. If you want a fast lightly-armored transport, Buggy all the way. But if you want a more heavily-armored transport (50 more health and armor) for those tough situations, I'd definitely choose Humm-Vee. But since you only have the choice of one of them because they're on different teams, I guess it doesn't really matter unless you stole an enemy transport. Anyway, great topic!

Can we please just call *cheat name removed*, *cheat name removed*? No need to make publicity for it .

AFAIK *cheat name removed* does not bypass Renguard but isn't detected by Renguard either. So that means that people using Renguard can still use it. But I haven't tested that: I don't touch cheats.
