Got a issue with the FDS crashing at random times (crashlogs attached)

All the crashes bring up

Exception occurred at 0x006B6621 .text:0x006B6621 (server.dat)

with addresses 0x3f193356 (No Owner) or 0x3ec10b1d (No Owner)

If this is the crash I think it is (ScriptableGameObj::Remove_Observer), then you probably have a corrupt script (observer) floating around, according to StealthEye. You might be dealing with a corrupt GameObject as well.

Stew said something about it being a null pointer, just did a quick search in my plugins only and I have 183 GameObject refs used :/

Your not storing GameObject pointers inside your classes are you? You should only store the GameObject ID, never the pointer to the actual object, then use Find_Object to determine if the object still exists.

```
class MDB_SSGM_Beacon : public ScriptImpClass {
void Created(GameObject *obj);
void Destroyed(GameObject *obj);
void Killed(GameObject *obj, GameObject *shooter);
void Damaged(GameObject *obj, GameObject *damager, float damage);
bool IsDisarmed;
GameObject *InvisObjCont;
};
```

Possible cause?
