I have the disc in, it starts up the game, I put in my CD key and all that. It starts installing, gets stuck at 2%. I've already had this game installed, but had to uninstall it.

Anyone had this problem before?

The message I get says that there was an error, and to make sure the disc was in the drive. The disc is in the drive, and the drive works.

My guess is that your disk is unforgiveably scratched. Check the underside, how bad is the damage?

The game is not very damaged at all. There are a few minor scratches, but I've run discs with far more damage.

If it says it can't find the disk, then it would probably be your disk or drive having problems. This may seem very logical and it is :-S. Nothing we can do about this.

You could ofcourse PM Oblivion (check memberslist for exact nick, I think he uploaded an iso of renegade install disk once (u still need a valid serial to install/play it).
