PC Gamer Mod Of The Month: Red Alert A Path Beyond  
Second time's the charm? Renegade may have turned most people off the idea of a Command & Conquer-flavored shooter, but a team of modders has forged ahead with Red Alert: A Path Beyond, regardless. This multiplayer total conversion of the Westwood 3D engine used for Renegade is set during the alt-history WW II recounted in Red Alert, so it features most of the military hardware depicted in that 1995 classic. A beta version with six maps and a full section of classes recently debuted online.

I sometimes get an issue of PCG(PC Gamer) and this month I noticed at the bottom of page 122 APB was mod of the month I'm not sure if this is old or new news but anyways, Congrats guys

Yeah, we had like three threads on this back in the APB forums. Great attention though; they got the least amount of information wrong!

The article authors. Generally all of the articles written about the mod by big-time magazines and such had a number of incorrect information.
