Uh... you definitely need to re-install Renegade.

I agree. You don't get game2.exe until you install RenGuard, so you screwed something up.

Game2.exe comes with CP2, it's the No-CD version of game.exe from TFD. RenGuard also installs it, IIRC.

game2.exe is 1.037 Renegade, Renguard renames it so that your normal shortcuts start Renguard and then Renegade.

If you download CP2 without RenGuard, game.exe is default Renegade, and Game2.exe is a No-CD version.
