Hi, when I click on the server to play on, renguard pops up of course and do I click renegade. Now "renegade config" window pops up and when I click "ok" the renguard window pops up and this continues repeatedly
help?

What Windows version are you on? Try opening wwconfig.exe (it's in your renegade dir) and set it correctly, then launch the game through game2.exe and tell us if this works.

This isn't a renguard problem, btw, it's a Renegade problem.

Your system probably doesn't support some of the options, such as 16-bit colour. Try changing them.
