Urimas could you maybe make a laser for the ramjet or (500) sniper? I tried once with making a very thin box but with huge length and added it to the ramjet, but it looks ugly. Maybe you have a way to make it look cool ?

Urimas, did you remember to add all the files for the P90?

The skin for the model seems to be missing for first person and third person.

Di3HardNL, that laser on the ramjet... is very unfair.

I want to use the ramjet with the laser for my own map, I dont want to use it online, because its way harder aiming with it (you might think im wrong but i tested it out)

In that case, are all the files named right?

It's been added to Game-Maps.NET

P90
>>Download<<

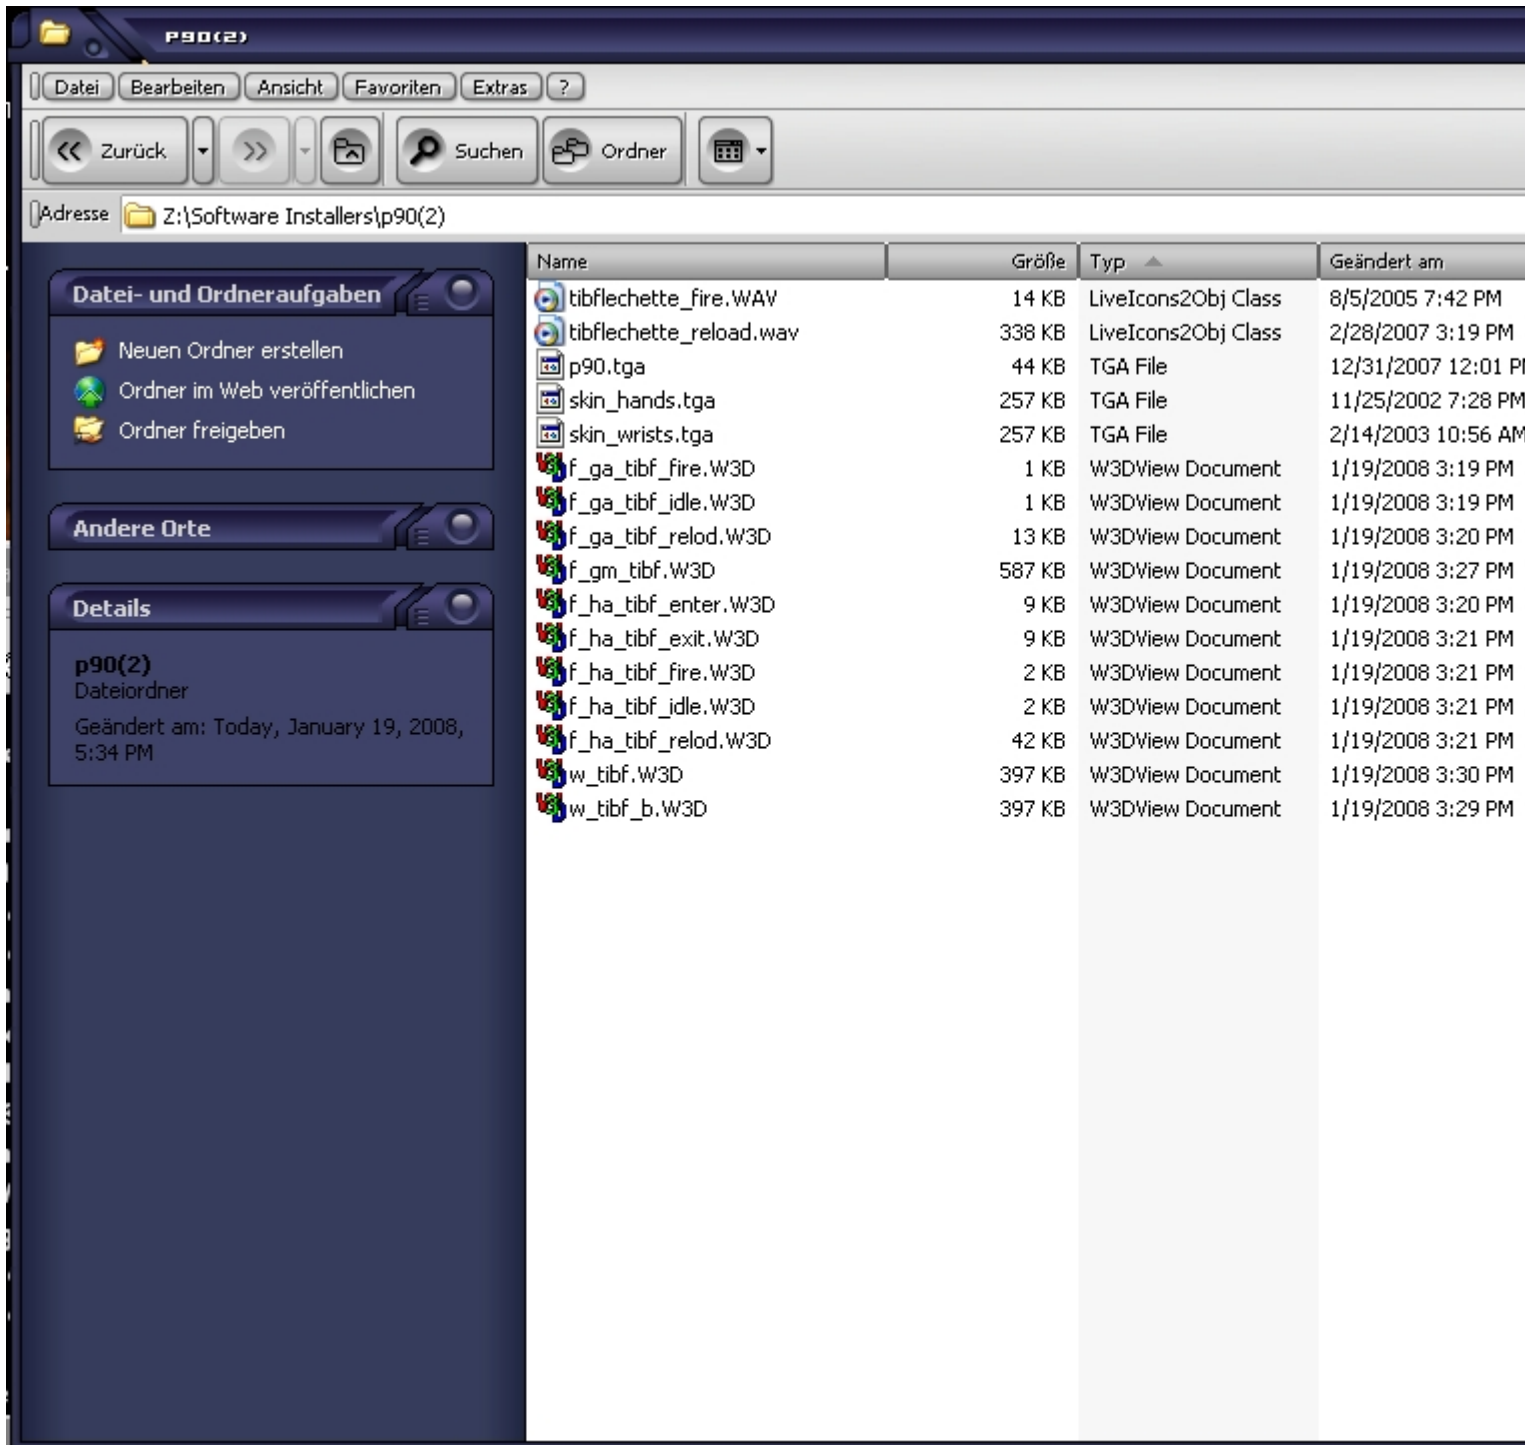

Not able to add screenshots for the file as yet, due to this "missing texture skin" that am having.

I've added a screenshot of the files that I have for the P90, sorry for the uber lage image, I was too lazy to resize.

P90.

I already have lots of weapon skins installed, I guess some could be messing me up, I check later by installing a new copy of Renegade.

Has anyone else downloaded this file and does it work for them?

Because, I'm still getting a missing texture error.

Urimas should the file p90.tga be named that, shouldn't that be the texture file.
