ok i was makeing my map took about 2 - 3 hours now and i nearly finished it i went to level settings in edit drop down menu and LE crashed i try and open my map again it sayd mp_Nod_Refinary is incorrecly linked so i clicked ok as im not useing that and that was only thing to press then i went to open to open my map as i saved it and it wont open and has a ERROR

this is what is dose when i choose mod package

this is what it dose when i open it

i have used a differant Objects.ddb file aswell but dose same thing

Good ol' level edit crashes.

Anyways, the only thing I can figure, is you dragged it somewhere where it shouldn't be. Or you deleted the preset, or something.

lol, seems you changed the mesh name,
were you duplicating buildings?

If it crashes when you try and load the map, then export to mix and try the mix-to-LE program.

Also to fix the crash on opening level/background settings right click the shortcut to LE, choose properties, go to compatibility tab and tick 'Disable Visual Themes'.
