Step 1: Go to Amazon.com OR look for "The First Decade" in stores.  
Step 2: Buy it  
Step 3: Install it  
Step 4: ???  
Step 5: PROFIT!!!

Trooprm02: warning + 1 for posting Warez. Next warning will have consequences.

Quote:Warez: This is a warez-free forum, and supports legitimate ownership of all games, software, music, movies, etc. Do not come here looking for CD/DVD images, serials, or any other form of warez.

At topic starter: you can buy Renegade for about 5-10 \$. You just need to find it in an online store, or else you can still buy the First Decade pack which contains Renegade.

If you downloaded the game illegally, you couldnt even play online, and single player is easy as pie on the hardest setting compared to what you have to do in a big server.

I love how someone deleted posts and modified this thread to remove all the stuff about downloading Renegade. As if that will actually change the fact that you can download Renegade and still play like everyone else. bit torrent ftw.

Only for xwis. If you direct connect or gayspy a serial means nothing.

Goztow I know the rule. I just find it amusing that someone wasted their time to hide something  
everyone knows.

He asks where he can download it. So that means he knows he can download it ... he just doesn't know where. Which really anyone with 2 brain cells and google can figure out. Really the only way I would be breaking the rule is to suggest he use \*t-t-t\*. Of course I wouldn't do such a thing though. I don't believe saying you only need a valid key for xwis is breaking a rule. Simply tech support. (Im an administrator I play these games with people every day) ((inb4 your an administrator you should know better))

Show me, what warez? Google defines warez as:

Widely used to denote cracked or pirate versions of commercial software. In other words, illegal pirated software.

^^Did I post anything even similiar to that? No.

You explained where to find an illegal version of Renegade and how to use it online. Don't argue on that.

I provided a link to a site with is perfectly legal, where someone can download "backup" copies of a game they already purchased, using a P2P protocol, Bittorrent, which is again perfectly legal (under the DMCA, 1998). Prove me wrong.

Goztow, I know you wanna be harder on moding these forums, but edit/removing posts on subjects/topics you are not knowledgeable about is going too far, no offense.

1. Since when do you think Canadian laws apply to a Swedish site (the site spreading the illegal software), on an international public forum, as answer to a question by a Dutchman for a game falling under American copyright?
2. Many legislations (but certainly not all) give you the right for a backup copy unless
3. Read page 32 of your Renegade manual. Surprise, surprise.
4. Read point 2. of the Renegade user license agreement.

Now stop wasting my and your time by your stupid games "I'm telling people how to download a game, use it without a valid serial but it's justified because they can get a backup copy of a game they clearly don't have". I got enough work around here trying to get the bit of moderation that people asked for in place.

Goztow wrote on Wed, 13 February 2008 10:33 Since when do you think Canadian laws apply to a Swedish site (the site spreading the illegal software), on an international public forum, as answer to a question by a Dutchman for a game falling under American copyright?

Im not trying to be a pain, instead im trying to explain to you why your original statement is wrong. The DMCA, (aka millenium act) is US law, but its basically two UN treaties so its kind of considered "international common law". That swedish site is the 23rd most visited website in the world (alexia), and it if were hosting any illegal content (bittorrent is perfectly legal in sweden), it would have been long gone. Bittorrent is all just metadata and contains no copyrighted material,

and for "backup" purposes, whether EA likes it or not, no matter the country, EVERYWHERE around the world you are ALLOWED LEGALLY to backup media (music, movies, games), despite what EA wants you to think.

I would know, im a moderator on the world's 8th largest bittorrent tracker/website.

You're talking crap like the best, trooprm.

<http://www.demonoid.com/> <- torrent site shut down by your Candian friends of the CRIA  
<http://www.elitetorrents.org/> <- shut down by the feds  
[todotorrente.com](http://todotorrente.com) and [trackertdt.com](http://trackertdt.com) <- both shut down and their administrators arrested by the Spanish police

Yeah, seems like all laws allow torrent sites to exist, mate...
