Ok this is a request anyone know of a software to crate 3-D models of shapes to show someone?

Kinda like me and my dad need to build somthing im designing it but drawing it on paper wont do....i need something i can make a 3-d model of how i want it to look then be able to put it on a flash drive and show my father....kinda like a 3-D blueprint

Gmax is good and free.

<http://www.turbosquid.com/gmax>

Or if you want a more professional thing, 3DS Max, but be willing to pay thousands for it.

Then you need Auto-CAD.

So.. being from autodesk, means their the same product? Why go and pay more for Vista when you can but the cheaper MS office...

use google sketch up is really simple. You can make 3d and 2d models.

You can basically use any 3d making program. I don't see how gmax or autodesk or anything like that isn't good.
